Professional Profile

UX/UI Designer specialized in websites, with a strong foundation in web development. I structure wireframes and interactive prototypes in Figma, applying user-centered design principles and WCAG accessibility standards. I have led the interface design of web applications, including an AI-powered platform for student emotional management. Known for my analytical mindset, active listening, and effective communication with development teams, I facilitate the precise implementation of design solutions.

Professional Experience

Full Stack Developer • Freelance Project (RS Lodgings)

January 2024 – May 2025

Development of a web application for room booking and hotel service management.

- Defined typography and color palette following WCAG accessibility standards, achieving a UI with optimal contrast and improved readability that reflects hospitality and luxury aligned with the brand identity.
- Designed an interactive prototype in Figma, establishing navigation flows and visual hierarchies that facilitated frontend implementation and accelerated product delivery.
- Developed an interactive interface with Vue.js and Tailwind CSS, integrating reusable and dynamic components that improved usability and responsiveness, ensuring a user experience consistent with the proposed design.

Full Stack Developer • Semillero de Investigación MIT – Corporación Universitaria Antonio José de Sucre

September 2023 – September 2024

Development of a web application with AI for emotional well-being management in university students.

- Conducted interviews with potential users and collaborated with stakeholders to draft user stories, enabling prioritization of key features and aligning the roadmap with project needs.
- Defined the color palette applying color psychology and institutional branding, achieving a UI that conveys peace, stability, and serenity while maintaining coherence with the university's image and values.
- Designed an interactive prototype in Figma based on minimalist design principles, using a clean layout with limited interactive elements to avoid visual clutter and convey calm, order, and stability in every view.
- Developed a responsive interface using Vue.js and Tailwind CSS, achieving an average usability rating of 4.6/5 on the Likert scale through user surveys.

Education

Bachelor's Degree in Systems Engineering • Corporación Universitaria Antonio José De Sucre • Sincelejo, Colombia • 2025
